GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. J. A. S. ADAMS, *Department of Geology, Rice University, Houston 1, Texas, U.S.A.*
PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, Germany*
PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University Museum, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
Dr. E. A. VINCENT, *Department of Geology and Mineralogy, The University Museum, Oxford*
PROF. A. P. VINOGRADOV *Vernadsky Institute, Moscow, U.S.S.R.*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers should be submitted to the appropriate Executive Editor—Prof. L. R. WAGER for papers from the United Kingdom and British Commonwealth, and for papers in English from Europe; Prof. C. W. CORRENS for papers in German or French; Prof. J. A. S. ADAMS for papers from the American continents. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction. The original script plus two copies will assist in expediting publication.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS, L. H. (1952) The use of ionization potentials—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 155–169.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and inclusive page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α, β, γ, ω, ε, n and vibration directions by X, Y, Z, O and E.

CONTENTS

JANUARY

HAROLD C. UREY: Evidence regarding the origin of the earth: Presidential Address 1

L. O. NICOLAYSEN, A. J. BURGER and W. R. LIEBENBERG: Evidence for the extreme age of certain minerals from the Dominion Reef conglomerates and the underlying granite in the Western Transvaal 15

A. J. BURGER, L. O. NICOLAYSEN and J. W. L. DE VILLIERS: Lead isotopic compositions of galenas from the Witwatersrand and Orange Free State, and their relation to the Witwatersrand and Dominion Reef uraninities 25

ERNST G. WRAGE: Argonbestimungen an Kaliummineralien—VIII. Ein Näherungsverfahren zur Lösung von Diffusionsproblemen 61

P. M. HURLEY, H. HUGHES, W. H. PINSON, JR., and H. W. FAIRBAIRN: Radiogenic argon and strontium diffusion parameters in biotite at low temperatures obtained from Alpine Fault uplift in New Zealand 67

S. R. TAYLOR: Meteoritic and terrestrial rate earth abundance patterns 81

J. R. BUTLER, P. BOWDEN and A. Z. SMITH: K/Rb ratios in the evolution of the Younger Granites of Northern Nigeria 89

JAMES G. MOORE: K/Na ratio of Cenozoic igneous rocks of the western United States 101

P. HERMAN and A. HUBAUX: Mechanical handling of geochemical data 131

EGON ALTHAUS and HELMUT G. F. WINKLER: Experimentelle Gesteinsmetamorphose—VI. Einfluss von Anionen auf metamorphe Mineralreaktionen 145

FEBRUARY

G. D. NICHOLLS and D. H. LORING: The geochemistry of some British carboniferous sediments 181

MAX BLUMER: The organic chemistry of a fossil: I—the structure of the fringelite-pigments. II—Some rare polynuclear hydrocarbons 225

D. KRUMMENACHER, C. M. MERRIHUE, R. O. PEPIN and J. H. REYNOLDS: Meteoritic krypton and barium versus the general isotopic anomalies in meteoritic xenon . . 231

E. R. DUFRESNE and EDWARD ANDERS: On the retention of primordial noble gases in the Peysanoe meteorite 251

TSAIHWA J. CHOW and C. C. PATTERSON: The occurrence and significance of lead isotopes in pelagic sediments 263

D. M. HIRST: The geochemistry of modern sediments from the Gulf of Paria—I . . 309

JOAN M. ROOKE and ADRIENNE M. FISHER: Validity of spectrographic determinations of trace-elements in granite G-1 and diabase W-1 335

RICHARD D. MCIVER: Ultrasonics—A rapid method for removing soluble organic matter from sediments 343

ERICH MERZ: The determination of hafnium and zirconium in meteorites by neutron activation analysis 347

ASOKE MOOKHERJEE: Certain aspects of the geochemistry of cadmium 351

MARCH

J. F. Lovering and L. G. Parry: Thermomagnetic analysis of co-existing nickel-iron metal phases in iron meteorites and the thermal histories of the meteorites . . 361

J. R. Huston and W. J. McCabe: Mass spectrometer measurements in the thermal areas New Zealand. Part 1: Carbon dioxide and residual gas analyses 383

Part 2: Carbon isotopic ratios 399

M. H. Carr and Karl K. Turekian: Chromium in granitic rocks 411

Edward D. Goldberg and Minoru Koide: Geochronological studies of deep sea sediments by the ionium/thorium method 417

APRIL

B. Weaving: Magnetic anisotropy in chronditic meteorites 451

A. E. Ringwood: Prediction and confirmation of olivine-spinel transition in Ni_2SiO_4 457

A. E. Bainbridge, H. E. Suess and H. Wänke: The tritium content of three stony meteorites and one iron meteorite 471

H. E. Suess and H. Wänke: Radiocarbon content and terrestrial age of twelve stony meteorites and one iron meteorite 475

V. Rama Murthy: The isotopic composition of silver in iron meteorites . . . 481

W. D. Ehmann: The abundance of nickel in some natural glasses 489

Carleton B. Moore and Harrison Brown: The distribution of manganese and titanium in stony meteorites 495

Hiroshi Hamaguchi, Rokuro Kuroda, Tsuneo Shimizu, Iwao Tsukshara and Ryuich Yamamoto: Values for trace elements in G-1 and W-1 with neutron activation analysis —II. Mo, Su, Ta, W. 503

A. E. Ringwood and Merren Seabrook: Cohenite as a pressure indicator in iron meteorites—II 507

Geochemical notes:

Maine C. Clark and D. J. Swaine: The contents of several trace elements in the standard rocks G-1 and W-1 511

W. G. Deuser: A new method for the separation of strontium from rubidium for Rb-Sr isotope dilution analysis 515

J. R. Butler and A. J. Thompson: Ta in the granite G-1 516

Letter to the Editor:

S. H. Wilson: Aque de Ney, a spring of unique chemical character . . . 519

Book Reviews:

F. Mendelson: The Geology of the Northern Rhodesian copperbelt (Reviewed by N. J. Snelling) 523

MAY

Michael Fleischer and R. E. Stevens: Summary of new data on rock samples G-1 and W-1 525

E. H. Timothy Whitten: A new method for determination of the average composition of a granite massif 545

Paul D. Lowman, Jr.: Tektites vs. Terrestrial rocks: a comparison of variance in compositions 561
R. F. Mueller: Energetics of certain silicate solid solutions 581
J. Ottemann and G. Friese: Rontgenfluoreszanalytische Bestimmung des Metallgehaltes in organischen Mineralstoffen 599

JUNE

J. Frank Slowey, Lela M. Jeffrey and Donald W. Hood: The fatty-acid content of ocean water 607
W. Schütze: Über die Datierung von Pb-Mineralien 617
P. R. Rushbrook and W. D. Ehmann: Iridium in stone meteorites by neutron activation analysis 649
St. Charalambus and K. Goebel: Tritium and argon^{39} in the Bruderheim meteorite 659
J. Zähringer: Ueber die Uredelgase in den Achondriten Kapoeta und Staroe Pesjanoe 665
W. D. Davis and J. L. Mewherter: Abundance of U-236 in nature 681

JULY

S. R. Taylor: The chemical composition of australites 685
G. G. Goles and E. Anders: Abundances of iodine tellurium and uranium in meteorites 723
J. A. Wood: Metamorphism in chondrites 739
J. P. Willis and L. H. Ahrens: Some investigations on the composition of manganese nodules, with particular reference to certain trace elements 751
E. Mazor: Radon and radium content of some Israeli water sources and a hypothesis on underground reservoirs of brines, oils and gases in the Rift Valley 765
T. G. Lovering and L. E. Patten: The effect of CO_2 at low temperature and pressure on solutions supersaturated with silica in the presence of limestone and dolomite . . 787
F. J. Stevenson: Chemical state of the nitrogen in rocks 797

AUGUST

Symposium on the geochemistry of Sedimentary Carbonate Rocks

Preface: 811
Earl Ingerson: Problems of the geochemistry of sedimentary carbonate rocks . 815
D. L. Graf: Minor element distribution in sedimentary carbonate rocks 849
A. C. Daughtry, D. Perry and M. Williams: Magnesium isotopic distribution in dolomite 857
P. E. Cloud, Jr.: Behaviour of calcium carbonate in sea water 867
H. H. Gehman, Jr.: Organic matter in limestones 889
E. Seibold: Kalk-Konkretionen und karbonatisch gebundenes Magnesium . . 903

SEPTEMBER

H. O. Finlay, A. R. Eberle and C. J. Rodden: Isotopic boron composition of certain boron minerals 911
S. R. Taylor: Consequences for tektite composition of an origin by meteoritic splash 915

NORMAN O. SMITH, STEVE KELEMAN and BARTHOLOMEW NAGY: Nitrogen in aqueous NaCl, $CaCl_2$ Na_2SO_4 and $MgSO_4$ at room temperatures and at pressures below 1000 psia 921

PAUL W. GAST: The isotopic composition of strontium and the age of stone meteorites—I 927

J. R. BUTLER and A. Z. SMITH: Zirconium, niobium and certain other trace elements in some alkali igneous rocks 945

W. SACKETT and G. ARRHENIUS: Distribution of aluminium species in the hydrosphere—I. Aluminium in the ocean 955

Geochemical Notes:

I. BERGMAN and W. GRANT: A tin still for dialysis against a stream of high purity water 969

C. S. SMITH: Note on the history of the Widmannstätten structure 971

TSAIHWA J. CHOW and CLAIRE C. PATTERSON: Correction 973

Book Review 975

Announcements 977

OCTOBER

R. R. MARSHALL: Cosmic radiation and the K^{40}-Ar^{40} "ages" of iron meteorites . . 983

R. E. CECH: Metallography of the Washington County Meteorite 995

A. E. RINGWOOD and L. KAUFMAN: The influence of high pressure on transformation equilibria in iron meteorites 1003

A. AMIRUDDIN and W. D. EHMANN: Tungsten abundances in meteoritic and terrestrial materials 1015

B. P. FABRICAND, R. R. SAWYER, S. G. UNGAR and S. ADLER: Trace metal concentrations in the ocean by atomic absorption spectroscopy 1027

G. W. MOREY, R. O. FOURNIER and J. J. ROWE: The solubility of quartz in water in the temperature interval from 25° to 300°C 1033

K. PRZIBRAM: Uber die Fuoreszenz organischer Spuren in anorganischen Stoffen und Verbreitung in der natur 1049

E-AN ZEN: Problem of the thermodynamic status of the mixed-layer minerals . . 1059

K. PRZEWLOCKI, W. MAGDA, H. H. THOMAS and H. FAUL: Age of some granitic rocks in Poland 1073

Geochemical Note:

L. H. AHRENS: Possible Zr-Hf fraction between earth and meteorites 1081

Notice: 1084

NOVEMBER

E. R. DUFRESNE and EDWARD ANDERS: On the chemical evolution of the carbonaceous chondrites 1085

R. PLILER and J. A. S. ADAMS: The distribution of the thorium, uranium, and potassium in the Mancos shale 1115

R. PLILER and J. A. S. ADAMS: The distribution of the thorium and uranium in a Pennsylvanian profile 1137

D. M. HIRST: The geochemistry of modern sediments from the Gulf of Paria—II. The location and distribution of trace elements 1147

KURT V. GEHLEN, HEIMO NIELSEN and WERNER RICKE: S-Isotopen-Verhältnisse in Baryt und Sulfiden aus hydrothermalen Gangen im Schwarzwald und jungeren Barytgangen in Suddeutschland und ihre genetische Bedeutung 1189

CLAUDE W. SILL and CONRAD P. WILLIS: The beryllium content of some meteorites 1209

DECEMBER

JOHN D. GODFREY: The deuterium content of hydrous minerals from the East-Central Sierra Nevada and Yosemite National Park 1215

H. J. LIPPOLT und W. GENTNER: Argonbestimmungen an Kalium-Mineralien—X. Versuche der Kalium-Argon–Datierung von Fossilien 1247

G. H. RILEY and W. COMPSTON: Theoretical and technical aspects of Rb-Sr geochronology 1255

A. P. VINOGRADOV and A. I. TUGARINOV: Problems of geochronology of the Pre-Cambrian in eastern Asia 1283

E. R. SEGNIT, H. D. HOLLAND and C. J. BISCARDI: The solubility of calcite in aqueous solutions—I. The solubility of calcite in water between 75° and 200° at CO_2 pressures up to 60 atm. 1301

F. LEUTWEIN und L. WEISE: Hydrogeochemische Untersuchungen an Erzgebirgischen Gruben-und Oberflächenwässern 1333

J. R. BUTLER and A. J. THOMPSON: Different values for caesium in G-I 1349

H. J. SVEC, G. D. FLESCH and J. CAPELLEN: The absolute abundance of the chromium isotopes in some secondary minerals 1351

Geochemical Note:

P. G. JEFFERY: The fluorine content of some standard samples 1355

Book Reviews: 1357
